

RICHLAND INDUSTRIES LLC

Contract Metal Manufacturing + Industrial Services + Commercial Construction

With regional roots dating back nearly 50 years, Richland Industries has evolved to serve a national client base with three complementary but distinct business units: Contract Manufacturing, Industrial Services, and Commercial Construction. As a privately-held family owned company with nearly 500,000 sq feet under roof, Richland has the resources, experience, and agility to serve our clients' needs.

Contract Metal Manufacturing

Richland Industries Contract Manufacturing Division is a full-service build-to-print contract metal manufacturer primarily serving clients in the industrial, municipal, construction, defense, and water treatment sectors. Richland's extensive range of capabilities include large-scale metal fabrication, precision cutting, CNC breaking/bending, certified ASME Section IX welding, and CNC/manual machining, as well as sand blasting, wet paint, and powder coating. With 21 overhead cranes ranging in size up to 25 tons, mobile heavy-duty material handling equipment, and an on-site railhead, Richland routinely processes large, complex components.

Industrial Services

With a focus on our commercial and government customers, Richland Industries Industrial Services Division provides a range of services regionally to assist companies with their maintenance, mechanical, and electrical service requirements. Richland's in-house team of certified technicians, extensive rolling stock, and large-scale rigging experience provide a comprehensive solution for our clients' industrial service needs. Additionally, Richland's Industrial Services Division manages multi-million dollar base service contracts for the US Government.

Commercial Construction

Richland Industries Commercial Construction Division provides a full range of services that include pre-construction, general contracting, design-build, design-bid-build, and construction management. Richland has experience with new builds and renovations principally in commercial, industrial, infrastructure, municipal, retail, and medical facilities. Richland's contract experience includes government contract mechanisms such as Simplified Acquisition of Base Engineering Requirements (SABER) and Indefinite Delivery/Indefinite Quantity (IDIQ) contracts.
